Grid/Zone Sampling Application

The Woodford County Conservation District's Grid/Zone Sampling Program will reimburse 1/2 the cost of crop and pasture field grid/zone sampling up to \$500. The goal of this program is to encourage variable rate applications of fertilizer and other soil amendments. This practice can be particularly useful in larger fields that contain multiple soil series and/or landscape positions, which may have varying degrees of fertility. Sampling can be paired with yield and soil maps to achieve best results.

Program requirements:

1. completed application
2. FSA form 578
3. Valid receipts from sampling service provider

This program accepts applications on a continuous basis. Funds are available on a first-come-first-served basis until depleted. Funding subject to board approval.
